

36mm Aura Clip On Rings

2 Part Ring Set recommended for use with poles of 28mm Diameter

Ring requirements

When placing the 36mm Aura Eyelet Rings we recommend 9 rings per metre (approx. 2 times fullness), but don't forget when calculating your ring requirement, you should always round up to an **even** number of eyelets in each curtain. If you use an odd number of rings the outer edges of your curtain will not hang correctly on the pole.

The rings are designed for use with lightweight to medium fabrics. When selecting your fabric and lining please consider the overall thickness, as it will be more difficult to clip the eyelet together the thicker the combination of fabric and lining.

Avoid placing the eyelet rings on a seam.

Step By Step Guide

ONE: Open the rings by inserting a small flat head screwdriver into the notch on the ring and carefully ease apart.

TWO: Now the ring is separated, using a sharp pair of scissors (and with the right side of the fabric facing you), carefully cut away the fabric and eyelet reinforcement if used away from the inside the eyelets. Do not worry about fraying, the rings will hide any untidy edges.

THREE: Place the side of the ring with the spikes on to the front of the fabric.

FOUR: Place the other side of the ring at the back of the fabric and clip firmly together, make sure the fabric is flat and not tucked up anywhere. Repeat across the curtain.

Care Instructions

Following the care instructions for your curtain fabric. Before cleaning, gently remove the Hallis Aura Eyelet Rings from the curtain by easing the rings away with a small flat head screwdriver, applying gentle leverage.
