

Shaped Skylight Measuring Guide

Step 1: Select from below the shape that best represents your window shape

Step 2: Measure accurately the following measurements (for example if you have chosen base F measure the following)

1. Base Measurement
2. Measurement 2
3. Measurement 3
4. Measurement 4

We will then confirm from your measurements that the window shape is correct, and calculate the angles required in order to match your blind to the chosen window shape
