Measuring & Fitting Instructions

# GRIP FIT™

Measuring & Fitting  
Instructions

For Use with Roller Systems 32® & 40®

## CHECKING YOUR WINDOWS ARE COMPATIBLE WITH GRIP FIT™

### Is your recess solid?

Because the bracket system pushes out with up to 60kg of force, your recess needs to be solid. We have tested a whole host of substrates including brick, tile, plaster board and wood which are all suitable. However if your recess will move when pushed for example if you have plasterboard with nothing behind it, then your window won't be suitable for Grip Fit™.

### Is your recess deep enough?

The cassette is a total of 8cm deep, so your recess must be at least this deep to house the product.

### Are your walls parallel?

The Grip Fit™ roller blind grips onto the side of your recess. As a result of this your walls need to be parallel to each other and not taper forward or back where you are going to install the blind as this would stop the rubber compound from making contact with the wall fully.

## HOW TO MEASURE FOR GRIP FIT™

It is important to use a steel tape measure as fabric tapes can stretch over time.

- Measure the depth of your recess. It needs to be at least 8cm deep to accommodate the Grip Fit™ cassette.
- Check the walls are solid by pushing on them with your hand. If the walls don't move or bend when you push, then they are suitable.
- Measure the width of your recess at the top of the window. It is important to measure to the nearest mm.
- Measure the drop of the window in three places and note down the longest drop.

## FITTING GRIP FIT™

Once you have opened your blind, simply raise the cassette into your recess at an angle, level it out and fold the bracket levers down to lock in place. Now you can insert the blind into the cassette idle end first, Slide out the bracket covers and operate your blind.

The system works using a specially developed rubber compound and a clever bracket system to push out on your recess.

## Measuring & Fitting Instructions

### ADJUSTING THE CASSETTE FIT IF IT IS TOO TIGHT (Minus adjustment)

Minus adjustment block

### LEFT SIDE OF THE CASSETTE

Minus adjustment block

#### Fig.1

Fold both lever brackets up on the cassette, remove the cassette from the window recess and lie flat.

#### Fig.2 & 3

Slide the mounting plate out of the left side of the cassette (Fig.2) and remove the adjustment block (Fig.3) Rotate the adjustment block by up to -1, -2 or -3 **clockwise**

#### Fig.4 & 5

Slide the adjustment block and mounting plate back into the cassette and refit the lever bracket.

#### Fig.6 & 7

Fit the cassette back into the recess ensuring it is a snug fit and fold the lever brackets down to secure the blind.

## Measuring & Fitting Instructions

### ADJUSTING THE CASSETTE FIT IF IT IS TOO LOOSE (Plus adjustment)

Plus adjustment block

### RIGHT SIDE OF THE CASSETTE

Plus adjustment block

#### Fig.1

Fold both lever brackets up on the cassette, remove the cassette from the window recess and lie flat.

#### Fig.2 & 3

Slide the mounting plate out of the right side of the cassette (Fig.2) and remove the adjustment block (Fig.3) Rotate the adjustment block by up to +1, +2 or +3 **anti-clockwise**

#### Fig.4 & 5

Slide the adjustment block and mounting plate back into the cassette and refit the lever bracket.

#### Fig.6 & 7

Fit the cassette back into the recess ensuring it is a snug fit and fold the lever brackets down to secure the blind.

## CHILD SAFETY - BS EN 13120 GUIDELINES FOR CORDED BLINDS

### TENSIONED SYSTEM WITH CORD TIDY

#### 1. If fixing height is unknown

Blind drop **less than 2.5 metres**, the chain length must be less than 1 metre.

Blind drop **greater than 2.5 metres**, the chain length must be drop of blind minus 1.5 metres.

#### 2. If fixing height is known

All blind drop sizes, distance between floor and bottom of chain must be greater than 1.5 metres.

#### 3. Cord tidy

Affix a cord tidy to the wall at the maximum distance possible from the blind control mechanism ensuring all operating cords are taut (chain no more than 50mm apart at entry/exit of cord tidy).

### BREAKAWAY CONNECTOR SYSTEM

#### 1. If fixing height is unknown

The chain length must be max  $\frac{2}{3}$  blind drop.

#### 2. If fixing height is known

All blind drop sizes, distance between floor and bottom of chain must be greater than 0.6 metres.

#### 3. Chain must be fitted with 2 x Easybreak® connectors 200mm apart

Will break apart when excessive force is exerted on the chain.

**NOTE TO INSTALLER:** Please ensure general child safety warning tag is fitted on the product.

### WARNING

Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product.

To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck. Move beds, cots and furniture away from window covering cords.

Do not tie cords together. Make sure cords do not twist and create a loop.
