

# Senses Vertical Inside Recess Top Fix

## Fitting Instructions

For top fix, the above image shows how the bracket is attached.

**Step 1.** Butt the fitting tool against recess front face. If the fitting tool does not butt flat against the recess front face, then 89mm vanes will not fit within the recess.

**Step 2.** Position first bracket approximately 60mm from either end of the recess. Mark the location of the bracket with pen/pencil.

**Step 3.** Position the remaining bracket(s) spread evenly across the length of the blind. For bracket quantities, see table on next page

**Step 4.** Using a suitably sized drill bit, drill all marked positions (use wall plugs where appropriate).

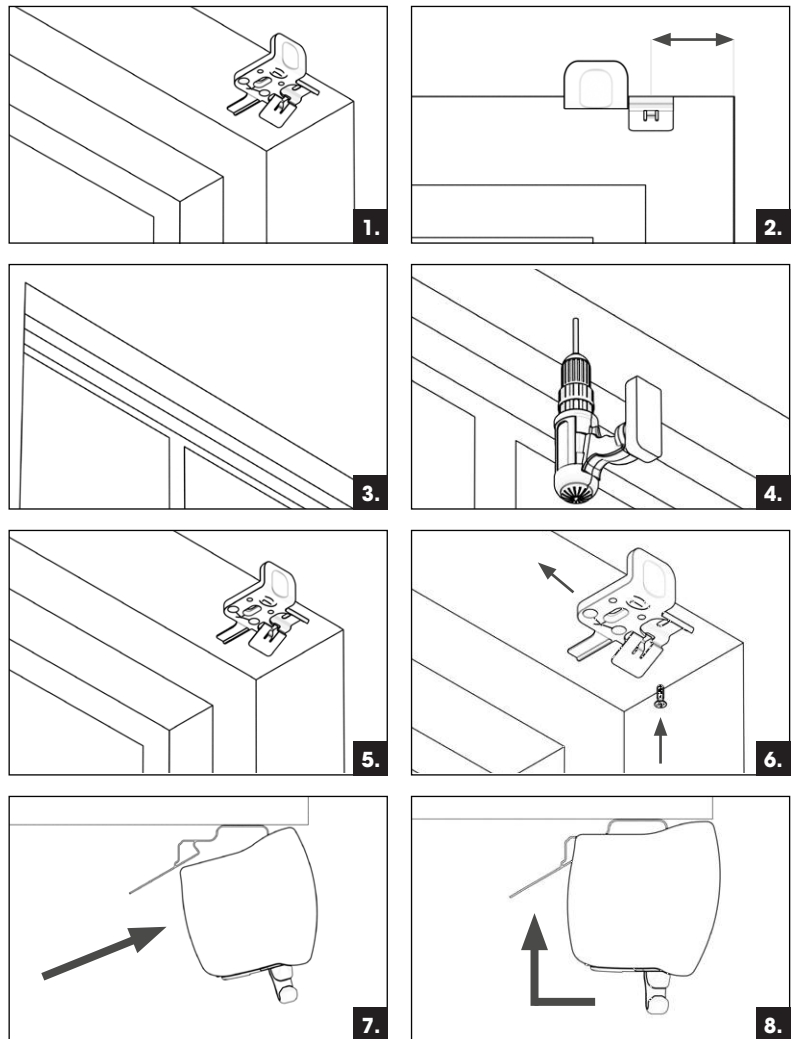

**Step 5.** Position the fitting tool on the recess front face, and line up the bracket with the drilled hole.

**Step 6.** Screw bracket in to place and remove the fitting tool. Repeat process for remaining brackets.

**Step 7.** For both Senses & Nexus, engage the front of the rail into the bracket like the image above.

**Step 8.** To secure, snap the rail into the bracket. To disconnect, push the tab at the back of the bracket and remove rail.

**PLEASE NOTE: Always use cord tensioning devices or suitable child safety devices with open chain or cord loops.**

| SENSES WIDE - BRACKET QUANTITIES |                          |
|----------------------------------|--------------------------|
| Width                            | No. of Brackets Required |
| < 1350mm                         | 2                        |
| 1350mm to 2099mm                 | 3                        |
| 2100mm to 3299mm                 | 4                        |
| 3300mm to 3999mm                 | 5                        |
| 4000mm to 5000mm                 | 6                        |

| SENSES SLIM - BRACKET QUANTITIES |                          |
|----------------------------------|--------------------------|
| Width                            | No. of Brackets Required |
| < 1350mm                         | 2                        |
| 1350mm to 2099mm                 | 3                        |
| 2100mm to 3299mm                 | 4                        |
| 3300mm to 4000mm                 | 5                        |
